Reliable Faster Cooling Machine

The wide range Sunrise Aqua Coolers offers a combination of sleek looks and amazing features to give you cool and refreshing water at all times

RAPID COOLING

- Low Power Consumption** : Superior quality grooved Copper tubes in heat exchanger and high efficiency compressor result in low power consumption.
- Anti-corrosive** : Blue fins on condenser coil give the cooler a longer life.
- Eco friendly** : Environment friendly new age refrigerants.
- Longer Life** : Rugged stainless steel/galvanised steel body for longer product life.
- Safe Drinking Water** : Due to high quality stainless steel tank, food grade water piping, float valve and other components which come in contact with drinking water.
- No Plumbing required** : Now connecting the water cooler is extremely easy. The water inlet hosepipe and overflow pipes provided with the water cooler unit make installation a matter of few minutes.
- Float valves** : Specially designed float valves are an added advantage. Made of food grade plastic, not only are they safe, they also withstand high intel water head pressure very easily.
- Adjustable pedestals** : Uneven surfaces are no problem with the adjustable pedestals. Made of highly non-corrosive and strong Nylon-6 material, they last longer in extreme atmospheric conditions.
- Ergonomically Designed** : For greater safety and operational convenience.
